The heart of our business is in providing our customers with products and assistance when they need it! Our customers' expectations constantly move forward. We strive to progress with them by always looking for new and better products. TIPCO is a leader by continuously establishing benchmarks for excellence in our industry. We exceed our customers' expectations and make every effort to ensure that our "connection is a perfect match."

Quality

We are committed to providing products and services that meet or exceed our customers' expectations. TIPCO has successfully developed a niche with our line of products and services that are at the forefront of the industry. This is evidenced by our growth and positive image in the marketplace. You can be assured of being treated as a valued and respected customer and of receiving fair prices – EVERY TIME! We look forward to growing with you!

Do it Right

We will always ask questions to assure we understand every aspect of our customers' requirements and of our individual responsibilities. By always acting in the best interest of our customers, we will assure the integrity and success of our own business. We will always perform our jobs consistent with the TIPCO Quality Assurance Policy, Procedures, and Work instructions.

Do it Now

Because our people are educated and empowered, we are able to make timely decisions and actions at all levels of the organization. This results in our company's ability to deliver premier products with great speed to the market. We exhibit a conscious attitude

PUMPS • VALVES

throughout the organization of strong origination support and interpersonal trust. It is our belief that this organizational environment of empowerment and trust provides the foundation for our best service to exceed the needs of our customers.

Do it Better

As a result of our education and organizational structure, we maintain a continuous and conscious awareness of opportunities to improve our management methods, systems, processes, and work practices which determine our products and services. We all have the awareness, skills, and active organizational support to make TIPCO the right choice for our customers and suppliers.

TIPCO Premier Manufacturing Partners

VNE CORPORATION – Located in Janesville, Wisconsin, VNE Corp. is a leading manufacturer of stainless steel fittings, valves, and related products for sanitary applications. TIPCO offers the full line of VNE products, including stainless steel tubing and custom fabrications, with full service and local support.

Manufactured by Sundyne Corporation, the innovative, simple design of the Sine Pump makes it one of the most efficient and reliable positive displacement pumps available. The unique single shaft and single sinusoidal rotor provide for low shear, superior suction, low pulsation and simple, economical maintenance. Ask your Tipco representative for more information.

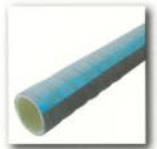

The largest lined piping manufacturer in the world, Resistoflex® offers the Resistopure™ line of hoses and fittings designed to

solve the toughest fluid handling requirements. Combining the best materials with innovative manufacturing technology, Resistoflex products allow customers in the chemical, medical, and food industries to operate more reliably, safely and cost-effectively. Tipco representatives can design, recommend and deliver custom hose fabrications to meet virtually any requirement.

The in-house hose production at Titan incorporates the extrusion of one-piece, seamless tubes over stain-

less steel mandrels, eliminating delaminating problems common to wrapped tubes. Tipco can fabricate sanitary rubber hoses in a variety of sizes to meet FDA, 3A, & USDA requirements.

Established in 1984, Flowtech Div. is a leading specialist in supplying stainless steel valves and positive displacement pumps for the pharmaceutical, biotech, food and beverage, and sanitary trucking industries. Unique products such as the Unibloc® PD pump, and the LabTop® Integrated Pump System are making Flowtech the standard in plants all over the world.

Carrying a 3 year warranty on liquid filled gauges and pressure transmitters, NOSHOK Sanitary Pressure Instruments provide unsurpassed quality and reliability. Your Tipco representative can supply pressure instruments that meet current 3A standards, as well as ASME BPE-2002, in a variety of configurations suited to meet your requirements.

From metered dispensing to bulk transfer, Ismatec offers tubing pumps and gear pumps to meet the strictest application requirements. Interchangeable single and multi-channel pump heads, as well

as a large variety of tube sets, interfaces, and accessories, all of which can be stocked locally by Tipco, increase the versatility and value of these high quality, Swiss made pumps.

A world leader in innovative technologies incorporating expanded PTFE, GORE™ manufactures High Resilience Tubing that is the most durable and dependable pump tubing available. For unmatched reliability and purity in a peristaltic pump, ask about GORE™ STA-PURE® and CHEM-SURE® Tubing.

Using only specially formulated materials certified to meet the criteria of the FDA, 3-A Sanitary Standards, and USP Class VI, Newman manufactures high quality sanitary gaskets, o-rings and seals.

Tipco stocks tri-clamp style gaskets in a variety of sizes, as well as offering custom lid and door seals, in materials including EPDM, Buna-N, Silicone, Viton® and Teflon®.

Colder Products Company (CPC) is the worldwide leader in the design and manufacture of controlled performance connections that allow flexible hose and tubing to be easily connected and disconnected. TIPCO is an authorized stocking distributor for medical device, chemical management, bio-processing, and food & beverage connections.

One SOURCE, one SYSTEM, one SOLUTION. As a Goodyear STAR Distributor, TIPCO is committed to providing the safest and most reliable hose fabrication in the Mid Atlantic. Tipco stocks a full range of Goodyear hose for the Food & Beverage, and Sanitary Processing industries.

A manufacturer of high quality washdown products, SuperKlean offers a complete line of nozzles, mixing stations, and hoses to provide efficient means of cleanup in any food, dairy, or pharmaceutical processing facility where washdown sanitation is essential.

With well-known brand names like Tygon®, Sani-Tech®, Acutech, Re-Seal®, Flexible Components, and BarbLock, Saint-Gobain offers the largest selection of polymer products available in the industry from one manufacturer. From tanks and valves to hoses and tubing, Tipco, Maryland's only fabricating distributor, can meet your most critical fluid handling requirement.

Designed, manufactured and quality controlled to be totally interchangeable with Swagelok® brand tube fittings, SSP Instrumentation's Duolok® fittings are 100% Made in the USA following rigorous ISO 9001 protocol. For unsurpassed quality and dedication to customer satisfaction, ask your TIPCO representative about the SSP line of tube fittings, pipe fittings and valves.

Using patented manufacturing technology, Coreflex specializes in extremely flexible, smooth-bore, Teflon® hoses and hose assemblies. With an extensive, local inventory of a wide variety of fittings, Tipco can provide quick turnaround on virtually any hose requirement.

Globally recognized as the premier leak-free, push-to-connect fitting system. TIPCO stocks a full line of Legris fittings, tubing, flow controls, stainless steel fittings, FRL's, and quick connects. Vendor managed bin stocking programs are available from your TIPCO territory manager.
